**Multipass Burning System Reduces Wood Consumption & Less Emissions.  
Hot plate in secondary burn chamber for reigniting exhaust gasses.**

**Exclusive "Never-Clean®" Water Filled Boiler Tubes for Maximum Heat Transfer.**

**Connects to Forced Air  
or Hotwater**

infloor heating, hot water baseboards, overhead blowers

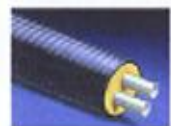

**Forced Air Heating**

If you presently heat with an existing Forced Air System, you simply install a water-radiator in your existing duct work and let the outdoor furnace take over the heating. Your existing furnace can stay in place as the back-up system.

**Existing Boiler Heating**

With an Existing Boiler (gas, oil, electric), our furnace can be hooked into the old system, which can then remain as the back-up.

THE HOT WATER IS CIRCULATED TO DIFFERENT BUILDINGS IN UNDERGROUND INSULATED PIPES

CSA B366.1 - M91  
Made by Quality Craftsmen

(Models may not be exactly as shown - weights are approximate)  
\*\*Maximum heating may vary depending of geographical area.

**Dealerships are available.**
